Summary

- Frontend Developer with strong expertise in **React, Next.js, Tailwind CSS, TypeScript, and Framer Motion**. Experienced in **turning UI/UX designs into fully functional, responsive web applications**, implementing modern interfaces, animations, and scalable component structures. Adept at problem-solving and delivering high-quality results in fast-paced, collaborative environments.

Skills

- **Programming Languages:** JavaScript, TypeScript, HTML, CSS
- **Frameworks & Libraries:** React, Next.js, Tailwind CSS, Framer Motion
- **Software Development Practices:** Responsive design, API integration, state management, Git, testing

Professional Experience

• OnlyFounders by Founders Hub Network

Frontend Developer

Remote

Jun 2025 - Present

- Designing and Implementing the full frontend of the platform, turning ideas into functional, responsive pages. Built the landing page, key sections, routing, startup pages, create-startup flow, admin panel, and dashboards such as Founder Dashboard and Investor Dashboard, ensuring a seamless user experience across devices. Continuously improving interface design and functionality while delivering production-ready code.

• InspireTech Solutions PH

Frontend Developer

Remote

Jun 2024 - May 2025

- Built and enhanced user interfaces for InspireTech Solutions' Business Intelligence and analytics platform. Developed responsive pages and interactive components to support BI reporting, data visualization, ERP integration, and client dashboards, improving usability and efficiency for end users.

• Visionary Web Designs

Frontend Developer

Remote

May 2022 - Apr 2024

- Developed and optimized client websites and web applications, building responsive layouts, interactive features, and smooth user experiences. Delivered high-quality, client-ready solutions across web design, e-commerce, and digital platforms.

Personal Projects

- **Socially:** a real-time social media platform with threaded posts, user authentication, profiles, content creation, and live interactions. Built responsive, engaging interfaces with scalable features for seamless user experience across devices.
- **CarHub:** Developed a modern car rental showcase platform featuring responsive layouts, dynamic search and filtering, and real-time vehicle data integration. Implemented key features such as hero sections, interactive car cards with pricing and specifications, and rental calculation tools to streamline car discovery and comparison. Built following best practices for performance, optimized images, and seamless UX across devices, demonstrating a professional, production-ready frontend solution.
- **AI Chat Interface:** Developed an AI-powered conversational interface integrating Hugging Face's Zephyr-7b-beta for intelligent, context-aware responses. Features include real-time voice input/output, dark/light theme switching, and responsive design. The project demonstrates modern web development practices, error handling, and accessibility, showcasing enterprise-ready AI chat capabilities for enhanced customer interactions.

Education

• Software Engineering

Graduated in 2021

Kuala Lumpur, Malaysia
