

Morhaf Ghziel

Full-Stack Developer — React, Next.js, TypeScript, AI Integration

Riyadh, Saudi Arabia · +966 50 714 9775 · ghzielmorhaf@gmail.com
morhaf.me · linkedin.com/in/morhaf-ghziel-a720a72b9 · github.com/MorhafGhziel
Arabic — Native · English — Professional

PROFESSIONAL SUMMARY

Full-Stack Developer with 5 years shipping production web applications, in product teams since 2021. Builds React and Next.js interfaces backed by real systems — REST APIs, PostgreSQL, auth and payments. Ships LLM-backed products end to end, with multi-provider fallback and cost control that keep AI features reliable. Led a frontend team of 3 at INNO and delivered 7 paid client builds solo.

TECHNICAL SKILLS

Languages · TypeScript, JavaScript, SQL, HTML5, CSS3

Frontend · React, Next.js (App Router, Server Actions), Tailwind CSS, Framer Motion, GSAP, HTML5 Canvas, Accessibility (WCAG AA), RTL / Arabic layout

Backend and Data · Node.js, Express, REST APIs, PostgreSQL, Supabase, MongoDB, Prisma, Zod, NextAuth, Clerk, JWT, OAuth 2.0

AI and LLM · Google Gemini, Groq, LLM API integration, prompt engineering, structured JSON output, streaming, multi-provider fallback, latency and token budgets

AI-Assisted Development · Claude, Claude Code, Cursor, Kimi, ChatGPT, GitHub Copilot, agentic coding workflows

Tools · Git, GitHub, Vercel, Figma, Agile, CI/CD, PayPal, ClickPay, Resend, S3 storage

PROFESSIONAL EXPERIENCE

Frontend Lead — INNO

Riyadh, Saudi Arabia · Hybrid · Full-time · Oct 2025 – Sep 2026 (1 yr)
Frontend Developer, Oct 2025 – Feb 2026 · Frontend Lead, Feb 2026 – Sep 2026

- Led a frontend team of 3 developers, setting code standards, review process and a shared component architecture across 15+ screens.
- Rebuilt the company's bilingual corporate site from scratch in Next.js 16, React 19 and Tailwind CSS v4, cutting runtime dependencies by 60% and removing roughly 47MB of 3D assets. Fixed scroll-performance problems earlier teams could not.
- Authored a CSS-only design system with brand tokens, 22 custom animations and 7 illustrated SVG scenes, with no animation library. Cut image assets from 190KB to about 2KB.
- Engineered right-to-left architecture end to end: Arabic as the default server render, CSS logical properties, bidirectional text isolation and locale-aware digit systems.

Frontend Developer — OnlyFounders, Founders Hub Network

Bangkok City, Thailand · Remote · Contract · Jun 2025 – Nov 2025 (6 mos)

- Built the frontend for a Web3 fundraising MVP, translating smart-contract events into reactive UI state with real-time on-chain data and multi-wallet connectivity.
- Architected the frontend in TypeScript, Tailwind CSS and Zustand, handling wallet switching, transaction signing and gas estimation without page reloads or state loss.

Frontend Developer — Arcanys

Cebu, Central Visayas, Philippines · Remote · Full-time · Nov 2021 – Apr 2024 (2 yrs 6 mos)

- Built and maintained frontend features across multiple client web projects in React and Next.js, from marketing landing pages to in-application screens.
- Structured reusable component libraries and responsive layouts, and integrated REST APIs so features behaved correctly against real responses and error states.

Freelance Full-Stack Developer

Saudi Arabia · Remote · 2024 – 2026 · concurrent with full-time roles

7 paid client builds including Etar, Alpha Factory and IEDAR. Full case studies at morhaf.me

- **Omdah** · Oct 2025 – Feb 2026 · Bilingual site and CMS for a video production studio. Self-serve admin with inline editing, presigned-URL video uploads and a Range-request proxy for smooth scrubbing.
- **Snaya** · Dec 2025 – Feb 2026 · Arabic-first site for a talent agency, with the whole motion system hand-built and no animation library.

PROJECTS

Craftly — AI CV Generator

github.com/MorhafGhziel/ai-cv-generator · Next.js · TypeScript · Prisma · Neon PostgreSQL · Gemini · Groq · Zod

- Takes a CV as PDF plus any job posting and returns a tailored CV, drafted screening answers and a print-ready A4 PDF.
- Dual-provider LLM layer over Gemini and Groq with automatic failover, model-health detection and a shared latency budget that prevents serverless timeouts. Every response Zod-validated, with one retry that feeds the parse error back into the prompt.

Archy — Natural Language to Database Schema

github.com/MorhafGhziel/devflow-ai · Next.js · TypeScript · Prisma · Neon PostgreSQL · Clerk · Gemini · Canvas

- Turns one sentence describing an app into a live interactive ER diagram, then generates the Prisma schema, TypeScript types and PostgreSQL DDL from the same graph. Canvas hand-built, no diagramming library.
- Calls Gemini over raw fetch with abort controllers and typed retryable errors, then repairs model output so it always compiles.

EDUCATION

Bachelor of Software Engineering

Asia Pacific University · Kuala Lumpur, Malaysia · 2021
